

Food waste innovation on campus: **inspiring impact with AI**

Presented by Winnov

**$\frac{1}{3}$ of all food is
never eaten**

**The food industry is at a
tipping point**

**5%-15% of the
food a kitchen
buys is wasted**

**It's a \$100bn
problem for
the sector**

Winnow has a range of solutions to suit every kitchen

VISIONcontrol

Track food waste with image capture to visualise waste reduction opportunities

VISIONAI

AI

Motion camera with connected scale and in-built AI capability. Fully automated, "Throw and Go" Waste capture.

VISIONAI+

Accelerated pathway driving waste reduction. In depth support from our world-class waste coaching team, and premium onboarding and technical support.

VISIONPW

A touchless system that automatically captures waste weight data and images.

● Location: Kitchen

● New Item Added

Item weight:

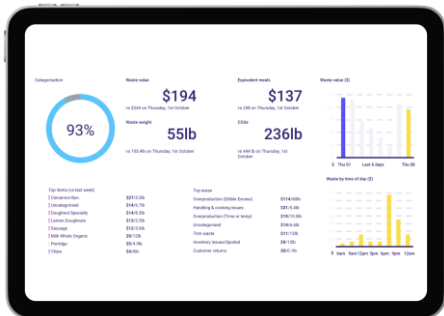

0.35kg

Total weight:

12.3kg

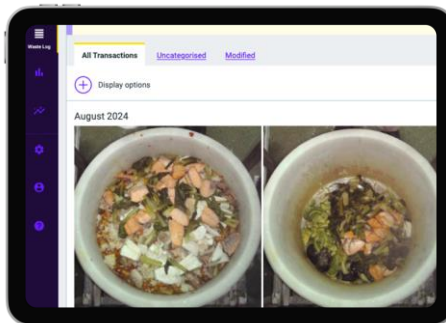

In kitchen reporting targets behavioral change on a daily, weekly and monthly basis

Push Reporting & Benchmarking

- Daily and monthly reporting
- Categorize waste by area
- Trend of reductions over time
- Benchmark your sites vs industry

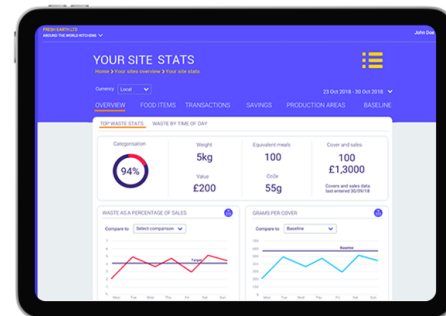

Provide valuable insights to target areas to make change

Food Waste Photos

- Correct wasteful behaviors with retraining
- Help teams reduce preparation waste & increase yield
- Review service by service using Timeline

Photo evidence demonstrates accuracy of data & change over time

Waste Intelligence with Winnow Hub

- Visualise data with customisable dashboards
- Zoom into individual sites or filter views for brands, regions or groups
- Track your progress against your ESG goals

Drive impact and engagement at enterprise level

St Faiths School | Chartwells Independent | Compass Group

St. Faith's School, has reduced food waste by 58% since 2017 using Winnow's AI technology. The school integrates food waste education into its curriculum, helping students understand environmental responsibility while the kitchen team optimises portion sizes and repurposes leftovers.

£13,300

Saved annually

23,00 meals
saved annually

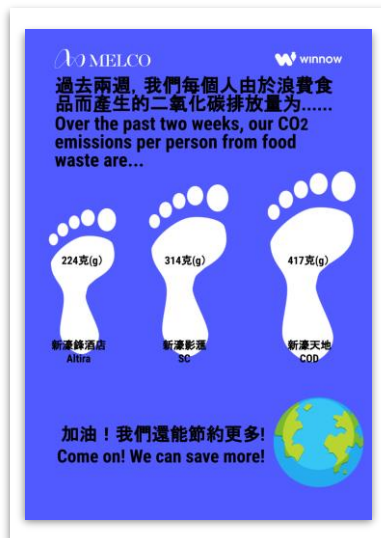

40 tons CO2e
Saved annually

"Communication is key. The team needs to be passionate about reducing food waste, and the data needs to be shared with everyone."

Peter Burt, General Manager,
Chartwells Independent at St
Faith's

The power of human expression

A controlled field study showed that anthropomorphised food imagery prompted the strongest emotional engagement and behavior change, versus other approaches like environmental messaging.

Putting it into practice with LSE

VisionPW and VisionAI were deployed across LSE's campus catering following the trial. Learnings from the study were applied to great effect.

34%

Reduction in plate
waste

> 900kg

Food waste prevented
annually

Over the past 2 weeks,
at London School of
Economics - Bankside
Hall we have reduced
our waste by 15%.

Compared to the baseline waste
data from early October 2022.

Did you know?

That every gram of food
waste causes 4.3 grams
of CO2 emissions?

If we kept those savings up
for a year, the CO2 emission
savings from each of us
would be enough to drive a
petrol car 43,542 miles.

Adopted worldwide. Trusted everywhere.

~3,000 locations
40+ universities using Winnow

53% global average
waste reduction

50m meals saved per year

\$70m saved per year

Winnow can be integrated into systems to both pull data from key systems and send data to downstream platforms to drive more operational efficiency

Key benefits

Accurate
waste data

Up to date inventories, fewer adjustments,
& more accurate ordering

Better visibility
into F&B P&L
